

THE BOARD OF DIRECTORS' REPORT
For the period ended March 31, 2020

Fidelity United Performance

Another profitable quarter and a good start to the year for Fidelity United. The company has achieved profit of AED 541k. Top line has increased by 86% as compared to prior year and underwriting profit has improved by 2%. Bottom line has improved by 240%.

2020 Outlook

Though we have improved in almost all segments and lines as compared to prior year and our projections of 2020, we do expect that the challenge which COVID-19 has thrown to the world will impact the overall insurance business of UAE, particularly in respect of the operational and credit risk. However, we strongly believe that as a company, we are very much equipped and prepared to face the challenge and will come out of it strongly with no significant impact on our 2020 results.

In line with the sterilization program of the UAE, our Business Continuity Plan is working extremely well with almost **No** disruption of services to all our stakeholders including government entities, regulators, customer and employees. Our results of Q1 has demonstrated that and we are confident to continue following the same path in the remaining quarters as well.
